WHAT IS CLAIMED IS:

1. An article comprising a medium storing software that causes a processor-based computer system to perform the following steps:
    a. create a time management entry in a time management application; and
    b. attach a file to the time management entry.

2. The article of claim 1 wherein the time management entry is an appointment in a time management application.

3. The article of claim 1 wherein the time management entry is a task in a time management application.

4. The article of claim 3 wherein the task is in an assignments due list of a calendar time management application.

5. The article of claim 4 wherein the time periods in the calendar time management application are class periods.

6. The article of claim 1 wherein the attached file' association with the time management entry is indicated with a graphical icon in the application near the time management entry.

7. The article of claim 6 wherein the user is able to activate the application associated with the attached file and view the attached file by selecting the graphical icon.

8. A system, comprising:

        a processor;

        a memory coupled to the processor; and

    a. a storage medium coupled to the processor including a software program that, upon execution:

        i. creates a time management entry in a time management application; and

        ii. attaches a file to the time management entry.

9. The system of claim 8 wherein the time management entry is an appointment in a calendar time management application.

10. The system of claim 8 wherein the time management entry is a task in a calendar time management application.

11. The system of claim 10 wherein the task is in an assignments due list of a calendar time management application.

12. The system of claim 11 wherein the time periods in the calendar time management application are class periods.

13. The article of claim 8 wherein the attached file' association with the time management entry is indicated with a graphical icon in the application near the time management entry.

14. The article of claim 8 wherein the user is able to activate the application associated with the attached file and view the attached file by selecting the graphical icon.

15. A portable computing device, comprising:

    a processor;

    a memory coupled to the processor; and

    a. a storage medium coupled to the processor including a software program that, upon execution:

        i. creates a time management entry in a time management application; and

        ii. attaches a file to the time management entry.

16. The system of claim 8 wherein the time management entry is an appointment in a calendar time management application.

17. The system of claim 8 wherein the time management entry is a task in a calendar time management application.

18. The system of claim 10 wherein the task is in an assignments due list of a calendar time management application.

19. The system of claim 11 wherein the time periods in the calendar time management application are class periods.

20. The article of claim 8 wherein the attached file' association with the time management entry is indicated with a graphical icon in the application near the time management entry.

21. The article of claim 8 wherein the user is able to activate the application associated with the attached file and view the attached file by selecting the graphical icon.
